GEM 2027

German Evolution Meeting

March 1–4, 2027
SAVE THE DATE

The first German Evolution Meeting (GEM), as the successor of the Münster Evolution Meetings (MEM), aims to provide **a forum for evolutionary biologists** across different fields and career stages. In addition to offering an opportunity to present and discuss excellent research in evolutionary biology, **GEM** seeks to bring together researchers working in Germany and neighboring countries in a smaller setting that facilitates intensive **networking and discussion**. Johannes Gutenberg University Mainz has a strong focus on evolutionary biology, and Mainz is a welcoming and vibrant university town, which makes it an ideal venue. The meeting will be held in English.

Invited speakers

Public Lecture

(in English with German subtitles)

Monique Borgerhoff Mulder

One man and many wives: the Evolution of a Model

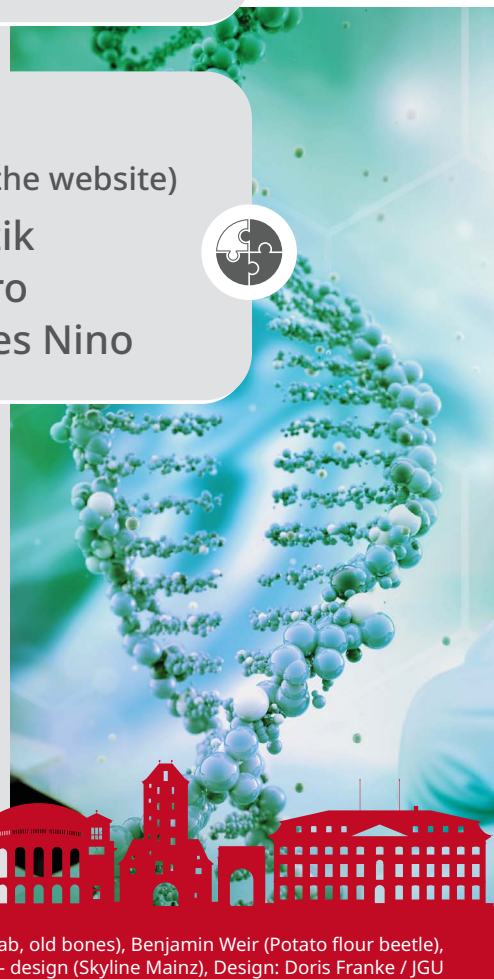

Scientific talks
